Corpus Christi

Corpus Christi College was founded in 1352, which makes it the 6th oldest College in Cambridge and it is also the 2nd smallest. It was established by the townspeople of Cambridge; Corpus Christi retains the distinction of being the only Oxbridge college that was not founded by royalty, nobility, or the Church.

The College is located right in the heart of Cambridge and its location allows easy exploration of Cambridge by foot as all main sightseeing sites are in close proximity.

Sustainability

The College vision is that sustainability will be embedded in every aspect of life and work at Corpus. All members of the College community will be engaged and educated in this vision, taking its principles with them into their futures. We are committed to minimising the carbon footprint and environmental impacts of our estate, operations, everyday working and study practices, and the food and resources that we consume. We recognise that we must respond to the urgent challenge of climate change, to play our part in the transition to a zero-carbon economy, and to conserve the resources, biodiversity, and condition of our planet for future generations.

Accessibility

Wherever possible we work hard to make all areas of the College accessible, however due to the age and structure of the building this can be at times slightly challenging. Please raise any access needs immediately so we can advise on the best solution.
